

FCC Baseline Broadband Availability Data by Massachusetts Municipality

***Please note, the data from the current FCC National Broadband Map shows internet availability as of June 30, 2023, and will be updated in May 2024 to reflect availability as of December 31, 2023, which is the version that will be used in the Challenge Process administered by MBI. The FCC National Broadband Map does not directly reflect the quality of internet service provided by providers. Counts represented in the data are for Broadband Serviceable Locations (BSLs), not units, and may not correlate with residential counts used by municipalities. MBI is aware that the map may not reflect the most accurate, up to date funding commitments from existing federal, state, or local sources - locations with enforceable commitments will not be eligible for BEAD funding. Additionally, the Commonwealth has awarded Last Mile grants with state funds to expand broadband connectivity in unserved towns. These grants are achieving coverage levels of 96-100% served. The coverage in these Last Mile towns may not always be accurately reflected in the FCC National Broadband Map. The source of the FCC National Broadband Map data is submitted by Internet Service Providers.*

Based on FCC Data Broadband Serviceable Locations (BSL's)	
State of Massachusetts	Totals:
Served	1,939,689
